Reliance Industries Limited ? Annual Report FY26 (Synthetic)
(SYNTHETIC DEMO DATA ? for hackathon demo purposes only)

Page 1

Business Overview

Reliance Industries Limited reported consolidated revenue growth of 14% year-on-year for fiscal year 2026, driven primarily by strong performance in the Retail and Digital Services segments. Reliance Retail delivered record growth, with same-store sales expanding across grocery, fashion, and electronics formats.

Jio Platforms continued its expansion trajectory, adding over 12 million net subscribers during the year and improving average revenue per user following tariff rationalization implemented in Q3.

Financial Highlights

Consolidated EBITDA margin improved to 19.8%, up from 18.2% in the prior year, reflecting operating leverage in the retail business and continued cost discipline across the oil-to-chemicals segment. Net profit for the year increased 11% year-on-year to a new company record.

The Board has approved continued capital expenditure toward new energy manufacturing capacity, with the first phase of the green hydrogen facility expected to be commissioned in the next fiscal year.

Outlook and Risk Factors

Management expects continued growth momentum in Retail and Digital Services into FY27, supported by festive season demand and continued 5G rollout. The company noted a minor implementation delay of approximately one quarter on one green energy manufacturing milestone due to equipment supply chain timing, which is not expected to materially affect the overall project timeline.

Key risks disclosed include global crude oil price volatility, regulatory changes in the telecom sector, and currency fluctuation exposure on international operations.
