

Q4 FY26 Performance Summary

Reliance Industries reported Q4 consolidated revenue growth of 12% year-on-year. Retail segment revenue grew 18% year-on-year, marking the segment's strongest quarterly performance on record, driven by store expansion and higher footfall during the quarter.

Jio Platforms revenue grew 9% sequentially, aided by the full-quarter impact of the tariff increase implemented in the prior quarter.

Segment Notes

The Oil-to-Chemicals segment showed a modest decline in margins due to planned maintenance shutdowns at one refining unit during the quarter, which management characterized as a temporary and expected impact.

New Energy segment capital expenditure continued as planned, with commissioning of the first manufacturing line still on track for early next fiscal year, subject to the previously disclosed minor equipment delivery delay.
